

Factsheet : Seminar Applied Econometrics

Module name	Seminar Applied Econometrics		Module number	M03
Study program/s	Master in Economics, Business and Data Analytics (MECO)			
Level of study	Bachelor ☐ Master ☒	Type of module	Mandatory ☒ Elective ☐	
Teaching team / module leader**	Lecturers : Prof. Anthony Strittmatter, Ph.D. Email : anthony.strittmatter@unidistance.ch Assistants : Vitor Krasniqi Email : vitor.krasniqi@unidistance.ch			
Frequency of completion of the module	Every autumn semester ☐	Every spring semester ☒	Every autumn and spring semester ☐	Other (please specify) ☐ ...
Duration of the module	1 semester			
Language of teaching	English			
ECTS	10			
Module level	Introductory ☐	Advanced ☒	Specialised ☒	

Contents and key concepts	This seminar module provides an opportunity to apply theoretical knowledge from econometrics to real-world data. It focuses on the application of statistical methods such as regression analysis, causal inference, and machine learning techniques. Participants will work on group projects to gain experience in data analysis, interpreting results, using econometric software, and engaging with academic literature and writing. Participants present their project findings and actively contribute to discussions of peer projects.
Prerequisites and conditions for entry requirements to the module	Prerequisites are the modules M01 Econometrics and M02 Machine Learning
Learning outcomes and competences	• Participants will be able to write a concise academic article adhering to appropriate academic writing styles and conventions. • Participants will be able to design and conduct an independent empirical study, including formulating research questions and hypotheses. • Participants will demonstrate proficiency in conducting literature reviews and applying proper citation guidelines. • Participants will develop the skills to handle, process, and analyze data effectively, using appropriate tools and techniques.

Study material	Data, scientific articles, textbooks, statistical software, depending on the specific seminar topic of the participants.								
Assessments	Type of assessment	Weight	Timetable of assessments		Modality				
			During the semester	End-of-semester exam <i>Registration required</i>	written	oral	mixed	individual	group
	Seminar Paper	45%	☒	☐	☒	☐	☐	☐	☒
	Presentation	45%	☒	☐	☐	☒	☐	☒	☐

Specific admission conditions for the end-of-semester exam	Participation at the presentation day in Brig.
Student workload (h)	
Interactions between teaching team and students <i>For example:</i> - classes - Group activities or group works - participation in forums or wikis - correspondence	10
Individual learning activities <i>For example:</i> - Reading and consulting materials and resources provided by the teaching team (books, articles, videos, etc.) - Individual research	90

- Completing non-assessed learning activities (interactive online exercises, producing work suggested by the teaching team, etc.)	
Group activities of the students <i>For example:</i> - Group discussions with other students - Group work	160h
Module assessments - Assessments during the semester (including preparation time) - End-of-semester exam (including preparation time)	15h
Total Student workload (h)	275h
